

Please do not limit satellite radio in anyway. Please keep the govt. hands off this industry and let the market place decide. I pay for this great service and I dont think the govt should be messing around in it and screw it up like it has done with healthcare and taxes. Let the people decide what services they want to pay for and dont pay for in the satellite radio business. I Love the service and since it is subscription please keep uncle sams hands off, they can only screw itup. Thank You.
